SUMMARY

I am Junior Web developer with good knowledge of HTML, CSS, JAVASCRIPT (ES6), BOOTSTRAP, TAILWINDCSS, REACT and Basics of NODE JS, EXPRESS JS , MYSQL and MONGO DB.

EXPERIENCE

Projects

- University Hackathon - Me and my team created a User Dashboard as the part of our project and I was assigned the task of building login and signup page working with mongo db database and creating charts for the user dashboard
- Knowledge Earth – This is my personal Project where I fetched the Wikipedia data using its API, I created this project in React JS and it is a SPA(Single Page Application) where the searching and data fetching and rendering it in UI is done without reloading the page
- Photo Glob – This is also an API based project where I used the UNSPLASH API and created an WEB APP where user can search and download Images of high quality for free.
- Portffolio – I created a personal portfolio using React js and it is an SPA(Single Page Application) as well.It showcased my works and my frontend design skills.
